Subject: review of section40"

very sad to see the hedge cutting season might be extended.

Living in New Ross I love to see the hedges- or what's left of them, and they can be nothing but a huge benefit to all in this still somewhat green land who love nature and all that thrive in it.

Please allow biodiversity to continue , please protect nature. And after all the awful bad planning and destruction of our fields and rivers, please say no to the uncaring who wish for nothing - except to slash burn and cut for no other reason than profit.
