**Subject:** Annual "works"

**Importance:** High

Dear Ladies and Gentlemen,

I would like to voice my opinion on the annual incineration of our Upland and mismanagement of hedgerows. As a "Nature Conservation" you might want to look into the horrific consequences for wildlife of these two actions.

Hundreds of animals are being burnt alive by the burning of the Upland, and hundreds of animals are being cut up alive and their nests, burrows and dens destroyed by hedge cutting in the wrong time of the year.

Surely you are aware of this? How can you justify this cruel "burnt offerings" and the slaughter?

Looking forward to your reply I remain  
Sincerely yours,
