**Subject:** Hedgerows and uplands

Dear Sir/Madam

Why do we need to burn uplands and destroy any and all wildlife? Fires can get out of control and destroy more habitats.

Can we not use machines to cut hedgerows? They don't grow back strong when cut with machinery. One way to create work for the unemployed would be to teach them how to cut hedges the old fashioned way. I'm sure there are plenty of older people who still know how to do this job properly!

Yours
