Subject: Mismanagement of hedgerows and incineration of uplands

I have been asked to write to let you know that I am not in favour of upland incineration and I believe hedgerows are one of the main wildlife corridors left in Ireland. Landowners, local authorities, Farmers and others should not be allowed to mess with our natural heritage.

I believe Ireland still has a chance to be seen as one of the greenest places on the planet - and that in turn will not only be good for the economy, our people and our wildlife, but would be good for farming too and the world wide reputation of Ireland as an island with integrity.

Regards
