Subject: Burning of upland vegetation and mismanagement of hedgerows in Ireland.

A Chara,

I'm writing to express my opinion that all burning of upland vegetation in Ireland should be banned. Our biodiversity has taken a huge hit with many species on the verge of extinction. Immediate action needs to be taken if this is to be reversed - before it's too late. I would also like to say that I feel hedgerows in Ireland is entirely mismanaged. LA's need revised and clearer guidelines now in order to achieve an appropriate management system.

Can you please reply and advise of what corrective action will be taken in relation to these issues?

Is mise le meas,
