Dear Joe,

I hope all is going well for you and yours. I wish you and yours a happy new year.

I hope you do not mind me routing my comments on the review of the Wilsall ~~to~~ through you; perhaps my misgivings are misplaced but my comments are very brief and maybe you will find time to note their content before transmitting to Ely Place. I like it the relevant professionals of the scientific community within the Dept will be fully consulted and that any proposals

for change (which I hope will not materialise!) will be subjected to rigorous scientific assessment.

Yours
