

BirdWatch Ireland Submission on the 2019-2020 State Wide Declaration.

Introduction

BirdWatch Ireland welcomes the opportunity to provide comments on the 2019-2020 State Wide Declaration. The State-wide Declaration 2019-2020 allows for a derogation from the general system of protection as specified under Article 5 of the Birds Directive. The article in the Birds Directive that relates to derogations is Article 9. No **evidence** has been provided to accompany the State-Wide Declaration that would demonstrate that the specific requirements of Article 9 have been met. Evidence may rest with the Department of Culture, Heritage and the Gaeltacht but if so it should accompany the list sent out for consultation. Without knowledge of whether such evidence exists, we must state that we believe that the Declaration 2019-2020 may be in breach of the Birds Directive. The Review of the Article 9 conducted in 2018 outlined how the State's practices in this regard fall short of what is required under this article. Therefore, we do not support the State-Wide Declaration for 2019-2020.

The process by which the government grants derogations needs to be addressed. This is said within the context of growing public calls for culls of Gulls, Cormorants and Brent geese, amongst other species. This is major concern as these species try and survive within a human environment and from the impacts of human activities on their ability to feed, roost and breed. Resources need to be allocated to public awareness raising opportunities of the ecological requirements of species and their behaviour and ways in which people can live with birds. In addition, funded research into the cause of specific problems and solutions in the locations where some communities are feeling the pressure, especially during the breeding season, from living with birds such as Gulls is urgently required. BirdWatch Ireland supports the implementation of Article 9 of the Birds Directive however it must be undertaken in a scientifically robust way, within the narrow focus in which it was intended and in compliance with European Court of Justice case law.

1.0 The Three Tests of Article 9 of the Birds Directive - European Court of Justice Case Law

The European Court of Justice (ECJ) has clarified that the possibility to derogate under Article 9 is subject to three conditions: First, the Member State must restrict the derogation to cases in which there is **no other satisfactory solution** as outlined in the first line of Article 9; secondly, the derogation must be based on at least one of the reasons listed exhaustively in Article 9(1)(a), (b) and (c); thirdly, the derogation must comply with the **precise** formal conditions set out in Article 9(2), which are intended to limit derogations to what is strictly necessary and to enable the European Commission to supervise them. A further condition that needs to be met, after the previous three have been met, is related to conservation status of the species concerned. Derogations should not be detrimental to the conservation of the species involved, which means that monitoring and assessment is needed for bird species as well. This latter point is outlined in Article 9(3) where it states ... *'the Commission shall at all times ensure that the consequences of the derogations referred to in paragraph 1 are not incompatible with this Directive'* which aims to ensure the conservation of wild bird species'.

The public consultation narrative outlines Article 9(1)(a) and the reasons for which a derogation may be granted. However, this cannot be undertaken in isolation from the first line of Article 9(1) or the

subsequent subsections of Article 9. The first line of Article 9 states that *Member States may derogate from the provisions of Articles 5 to 8, **where there is no other satisfactory solution.***

Derogations can only be given out where no other satisfactory solution or alternative exists. It is clear though that to pass this test in a court that the information to inform the decision to derogate must be scientifically robust. The problem has to be identified and defined before an alternative method can be devised and a solution can be found. The problems and the solutions should have a scientific and evidenced-based underpinning. It seems reasonable to state as a general proposition that any determination that another solution is unsatisfactory should be based on objectively verifiable factors, and that close attention needs to be paid to the scientific and technical evaluation of these. **No information has been presented within the public consultation documents on what alternative solutions have been tried and tested in order to support past or future derogations for any of the species listed in the 2019/2020 Declaration.**

In addition Article 9(2) lists the detail that the derogation must specify and this includes in Article 9(2)(c) that *'the conditions of risk and the circumstances of time and place under which such derogations may be granted.* This means that the conditions of risk to public health, to public safety etc as outlined in Article 9(1)(a) must be specified. The word 'specify' means 'to identify clearly and definitely' according to the Oxford English Dictionary¹. In the 2017/2018 Declaration the reasons for control are listed but the **conditions of the risk** are not. What is the level of threat to public health? What is the level of threat to public safety?

The European Court of Justice has adjudicated over numerous member state cases which were required clarification of the spirit and implementation of Article 9. BirdWatch Ireland lists several cases in the following paragraphs and these can be found on the European Court of Justice Curia website².

Case C-118/94 and Case C-159/99 provide precise wording on the requirements of governments under Article 9 on other satisfactory solutions. The Judgement of C-118/94 states:

Article 9(1) of Directive 79/409 on the conservation of wild birds, which provides for the possibility for the Member to derogate from the general prohibition on hunting protected species laid down in Articles 5 and 7 of the Directive **where there is no other satisfactory solution and for one of the reasons listed exhaustively therein**, and Article 9(2), which **defines the precise formal conditions** for such derogations, must be interpreted as authorizing the Member States to grant those derogations only by measures which refer in sufficient detail to the factors mentioned in Article 9(1) and (2). In a sphere in which the management of the common heritage is entrusted to the Member States in their respective territories, faithful transposition of Directives becomes particularly important.

Case C- 247/85 provides clarity on Article 9(1) and 9(2) and again specifies the requirement that the derogation must firstly comply with the test that there are no other satisfactory solutions and secondly outlines that the conditions of risk must be detailed and precise.

Court Judgement: The removal or destruction of nests is necessary only in specific cases in which the higher-ranking interests of public health and security must override the protection of **birds** and their habitats. The Belgian rules provide for a derogation which is not sufficiently delimited in fact, the derogation is not limited to **specific situations in which there is no other satisfactory solution** than the destruction or removal of nests, **in fact, it cannot be maintained that all nests built against houses and adjoining buildings always represent a danger to health. Furthermore, the derogation does not comply with the formal requirements set up by the Birds Directive that is it does not**

¹ Web page ref: <https://en.oxforddictionaries.com/definition/specify>

² https://curia.europa.eu/jcms/jcms/j_6/en/

specify the conditions of risk and the circumstances of time and place in which the derogations may be granted or the controls which will be carried out. The derogation provided for in the Belgian law does not comply with the prohibition contained in Article 5 of the Birds Directive and is too general in nature to be justified by Article 9 of the Birds Directive.

Case C-10/96, Case: 236/85 also address the requirement that no other satisfactory solution is the precursor to allowing for derogations under Article 9.

Case 262/85 outlines the legal obligation to specify the **conditions of risk and precise circumstances of time and place** under which a derogation may be granted.

Court Judgement: The Italian government has not put forward any evidence proving that it was necessary to include jay and magpie on the Italian list of **birds** which may be hunted in order to prevent serious damage to crops, livestock, forests, fisheries or water and that no other satisfactory solution existed. Neither has it indicated the reasons for which the listing of those species was, in its view, the only satisfactory solution to prevent serious damage. Finally, the provision in question does not specify the conditions of risk and the circumstances of time and place under which the derogation may be granted or the controls which will be carried out. Therefore, the inclusion of jay and magpie amongst the **birds** which may be hunted cannot be justified by the third indent of Article 9(1)(a) of the Directive.

2.0 Blanket Derogations

The 2017/2018 Declaration includes blanket derogation to allow the killing of species at any time of the year, by anyone, and anywhere. This goes against the specifics required under Article 9(2)(d) where the derogation must specify the authority empowered to declare that the required conditions obtain and to decide what means, arrangements or methods may be used, within what limits and by whom. **ECJ case law C-159/99** would call this into question that 'Although Article 9 therefore authorises wide derogations from the general system of protection, it must be applied appropriately in order to deal with precise requirements and specific situations'. In addition, the judgement in **C-247/85** also suggests that the reasons justifying the grant of a derogation to a broad category of people should be compelling and clearly specified in the derogation³.

3.0 2019/2020 Declaration

In the **2019/2020** State-wide Declaration the opening paragraph of this Declaration states that the 'Minister.... being of the opinion that the species referred to in Schedule 1 to this declaration represent a threat to public health or safety or are likely to cause serious damage to crops or to livestock or are likely to cause damage to fauna and being satisfied that no other satisfactory solution exists, hereby declares...'. There are two issues here: 1. The opinion that there is threat to public health and/or safety must be based on fact and supported by evidence of impacts, 2. The declaration lists 'the likelihood' that birds would cause damage. 'Likelihood' implies probability but this does not mean that it is definite. The impacts of the bird species listed should be 'proven' and based on scientific evidence. The ECJ Case Law on Article 9 clearly shows that derogations are granted for exceptions and must be underpinned by robust scientific evidence to determine if alternative solutions have been identified, tried and tested; that the derogation request complies

³ European Commission – 2008 - Guidance document on hunting under Council Directive 79/409/EEC on the conservation of wild birds" "The Birds Directive".

clearly with one of the options under Article 9(1)(a); and if the conditions of risk and other requirements of Article 9(2) are complied with.

3.1 Inclusion of Gulls in the 2019/2020 Declaration

BirdWatch Ireland is alarmed by the inclusion of three Gull Species in the 2019/2020 Declaration. The Declaration allowed for the taking of the eggs and nests of these species in Balbriggan in North County Dublin due to a threat to public safety. The species in question are Herring Gull (*Larus argentatus*), Great Black-backed Gull (*Larus marinus*) and Lesser Black-backed Gull (*Larus fuscus*). Of particular concern is the inclusion of Herring Gull as the conservation status of this species short and long trend for this species is 'decline'⁴ according to the most recent available survey and it is for this reason that the species is Red Listed as a Bird of Conservation Concern in Ireland⁵. However, BirdWatch Ireland is equally concerned that due process is undertaken to meet the specific and precise requirements of Article 9.

In relation to a previous declarations including gulls, the Department of Culture, Heritage and the Gaeltacht had sought information from the Health Service Executive (HSE) on whether there was any evidence of a potential threat to public health from gulls and the HSE stated that there was no scientific evidence to support this. The HSE also stated that there was potential for the gulls to cause a considerable nuisance and upset but there was no quantification of any impacts on public safety though the Derogation was for an impact on public safety. We ask what are the public safety grounds for including the three gull species in the Declaration? The proof of the conditions of risk as specified in Article 9(2)(c) are not provided for within the 2017/2018 Declaration.

Therefore, BirdWatch Ireland is of the view that the granting of the derogation to take the eggs and nests of the three listed Gull species **does not satisfy the specific requirements of Article 9 of the Birds Directive and these species should be removed from the 2017/2018 Declaration and any future Declarations:**

- Article 9(1) : no evidence of alternative solutions to the derogation having been tried in a scientifically robust manner.
- Article 9 (2)(c) : The conditions of risk have not been explained or spelled out in the Derogation and the HSE letter states that there is no health risk and there is no mention of a risk to public safety.
- Article 9(2) (d) : The derogation order given to the Community groups is scant on detail on how many eggs or nests can be removed, what to do if there are chicks in the nest, what happens the eggs, or who should undertake the task. There is a request that the Community Groups must report back on their activities but there is no detail given on what kind of information this should include: numbers of nests, numbers of eggs, locations, species in question etc.

3.2 Other Species on 2019-2020 Declaration.

Hooded Crow (*Corvus corone*)

Blanket and all-year derogation is questionable. The reason for control -that the species is a threat to public health and as a vector for the spread of animal diseases needs to be proven.

⁵ Colhoun K and Cummins S (2013), "Birds of Conservation Concern in Ireland 2014 –2019". Irish Birds. 9: 523–544

Magpie (*Pica pica*)

The conservation status for breeding Magpie populations is decline according to the most recent Countryside Bird Survey report 1998-2016 Crowe, O., Coombes, R.H., Tierney, T.D., Walsh, A.J., O'Halloran, J., 2017. *Countryside Bird Survey Report 1998-2016*. Birdwatch Ireland, Wicklow⁶. BirdWatch Ireland questions the all year blanket derogation to allow the killing of Magpie for the reason of Threat to Public health and as a vector in the spread of animal diseases. All articles of Article 9 need to be adhered to and evidence supplied of the alternative solutions which have been tested under Article 9(1), the conditions of risk etc under Article 9(2)(c) and the specifications under Article 9(2)(d).

Rook (*Corvus frugilegus*)

BirdWatch Ireland is unclear of what the term livestock feedlots refers to. Also, we are unclear as to why there is one month of respite for this species in January. All articles of Article 9 need to be adhered to and evidence supplied of the alternative solutions which have been tested under Article 9(1), the conditions of risk etc under Article 9(2)(c) and the specifications under Article 9(2)(d).

Jackdaw (*Corvus monedula*)

BirdWatch Ireland is unclear to what the term livestock feedlots refers in an Irish context. Also, we are unclear as to why there is one month of respite for this species in January. All articles of Article 9 need to be adhered to and evidence supplied of the alternative solutions which have been tested under Article 9(1), the conditions of risk etc under Article 9(2)(c) and the specifications under Article 9(2)(d).

Wood Pigeon (*Columba palumbus*)

BirdWatch Ireland has concerns that there is no respite from the derogation for the entire year for this species. We are also concerned that Wood Pigeon is a migratory species and ask if the state is in compliance with any requirements to ensure that EU populations of this species are satisfactory. All articles of Article 9 need to be adhered to and evidence supplied of the alternative solutions which have been tested under Article 9(1), the conditions of risk etc under Article 9(2)(c) and the specifications under Article 9(2)(d).

Collared Dove (*Streptopelia decaocto*)

The stated reason for control as a Threat to public health needs to be quantified and presented along with any future declaration. All articles of Article 9 need to be adhered to and evidence supplied of the alternative solutions which have been tested under Article 9(1), the conditions of risk etc under Article 9(2)(c) and the specifications under Article 9(2)(d).
