Hi

Im writing once again to ask have you done anything about the plague of gulls in Marino and city centre.

I have taken the following photos minutes ago and was rewarded by a flying full slashing fecal matter all over my window. My neighbours see fit to throwing a sliced pan onto their roof. My immediate neighbours empty their dinner plates into their garden. The park at the top of my avenue is a dumping ground for a couple of individuals who think they are good people by emptying their food waste every morning onto the grass for the gulls. Why are you not imposing fines for this. Why are you not putting notices on radio and tv citing its illegal to feed them. Feeding them ensures they return same time every day. Our schools nearby cannot allow the kids eat their lunches outdoors because of them so this cuts short their fresh air time.

Children are terrified of them with good reason. They know these creatures will attack when they have food.

Its about time now as we enter into the hatching season again to stand up and do something positive about it once and for all.

Hi

Im writing once again to ask, implore has any steps been taken to cull the epidemic in my neighborhood and city.

Our park Croydon every morning has hundreds of gulls already scavenging for food. And disgracefully, some idiots are actually emptying their food waste into the park for them to feed on rather than use their bins. As i write i see my neighbours have emptied a sliced pan onto their shed roof and cacophony of screeching now is unreal. Thus, my neighbours ensuring that we will be revisited each and every day now as they see them as a food source. Why are you not putting out notices on RTE and Radio Stations citing it is illegal to feed these creatures. I have just taken a photo and have been rewarded with one of them slashing fecal matter all over my bedroom window. What is wrong with you people. Children, including my own and grandchildren are terrified of them and with good reason. They attack humans if they have food. Our city is turning into a very sorry state. Our Liffey boardwalk cannot be used by us dwellers because it is full of walking zombies from drug addiction, alcohol addiction, mental health, and homelessness. Top that with gulls in their hundreds squaking up and down our streets. What do we have to do to stop it.

Time to do your jobs and act i would think.
