# **Application for Derogation Under Regulation 54 & 54A of the European Communities (Birds and Natural Habitats) Regulations 2011, as amended**

**Revision 2.0 – July 2025**

- This form can be used by any individual or Company applying for a derogation under Regulation 54 of the European Communities (Birds and Natural Habitats) Regulations 2011 (“the Regulations”) or any individual applying on behalf of the Minister for Housing, Local Government and Heritage under Regulation 54(A) of the Regulations.
- Note this application form is not for Domestic Dwelling Derogations (bats within private homes) which can be found here > ([3D Application Form](#))
- Please ensure that you answer questions fully in order to avoid delays and/or your application being rejected on the basis that it does not contain sufficient information and detail for the application to be considered further.
- Please read and familiarise yourself with the [NPWS Guidance on Applications for Regulation 54 Derogations for Annex IV species: Guidance for Applicants](#)
- Please read and familiarise yourself with the [European Commission's Guidance document on the strict protection of animal species of Community interest under the Habitats Directive](#)
- Please also note that the responses to these questions are supplementary to the documentation required for the NPWS to be in a position to consider your application. A complete application should include both the application form and an associated report. Failure to supply either will result in your application being returned and/or refused.
- In circumstances in which a derogation is given on foot of this application, the Applicant is responsible for ensuring compliance with the conditions of any such derogation, even though they may employ another person to act on their behalf. To carry out any activity without, or not in accordance with, a derogation granted under regulation 54 or 54A of the Regulations constitutes a criminal offence, subject to prosecution.
- If you experience any problems filling in this form, please contact the Wildlife Licensing Unit: [reg54derogations@npws.gov.ie](mailto:reg54derogations@npws.gov.ie)
- Please note – applications, associated reports and derogations will be published on the NPWS website and/or the Department’s Open Data website.
- Where any applicant is applying for a derogation to carry out surveys, please ensure to list all qualified ecologists and trainees under their supervision. See section 1(c) of Part A.

## Part A: The Applicant - Personal Details

These questions relate to the person responsible for any proposed works and who will be the **Applicant**. **If this application is being submitted on behalf of a third party, please also complete Part B below.**

### 1. (a) Name of Applicant

Title (Mr/Mrs/Miss/Ms/Dr)	Forename(s)	Surname
Mr	Shane	Connolly
<b>(b)</b> Company Name, if applicable	Teire Consulting	
<b>(c)</b> Address Line 1	5 Carraig Dubh	
Address Line 2	Tobartescain	
Town	Ennis	
County	Co. Clare	
Eircode	V95 H6P4	
<b>(d)</b> Contact number	[REDACTED]	
<b>(e)</b> Email address	[REDACTED]	
<b>(f)</b> Address where works are to be carried out if different from (b) above.		
Address Line 1		
Address Line 2		
Town		
County		
Eircode		

### Details of Person Submitting Application on Behalf of Applicant/Derogation Holder

Information relating to the person (e.g. ecologist) responsible for submitting the application on behalf of the applicant should be entered below:

### 1. (b) Name of Person/Ecologist

Title (Mr/Mrs/Miss/Ms/Dr)	Forename(s)	Surname
Mr	Shane	Connolly
<b>(b)</b> Company Name	Teire Consulting	
Address Line 1	5 Carraig Dubh	
Address Line 2	Tobartescain	
Town	Ennis	
County	Co. Clare	
Eircode	V95 H6P4	
<b>(c)</b> Contact number	[REDACTED]	
<b>(d)</b> Email address	[REDACTED]	
<b>(e)</b> Relationship to Applicant	-	

## Part B: Species covered by the Derogation

1. **Species of Animal:** Please indicate which species is/are the subject of the application:

- Bat
- Otter
- Kerry Slug
- Natterjack Toad
- Dolphin
- Whale
- Turtle
- Porpoise

2. Please detail the exact species (scientific name):   All Bat Species  

3. Please provide the maximum number of individuals affected\*   n/a  

4. Please provide the maximum number of breeding or resting sites affected\*   n/a  

5. Please provide the maximum number of eggs to be taken\*   n/a  

6. Please provide the maximum number of eggs to be destroyed\*   n/a  

\*If no figures can be provided for the maximum number of individuals, breeding sites, resting places and eggs to be covered by the derogation please provide reasons why.

  This application is for a roost disturbance licence for 2026, in order to allow me to enter and place equipment at or near bat roosts for the purposes of recording species and numbers to inform appropriate avoidance measures.  

7. **Species of Plant:** Please indicate which species is/are the subject of the application:

- Killarney Fern
- Slender Naiad
- Marsh Saxifrage

8. If you previously received a derogation for any species of animal or plant, please state derogation number and confirm that you have made a return to NPWS on the numbers actually affected by that derogation.

  DER BAT 2022-23  
DER BAT 2022-122  
DER BAT 2023-130  
DER BAT 2024-107  
DER BAT 2025-266  
I confirm all returns have been successfully submitted to date

**9. Proposed Dates for Activities:** Please indicate the timeframe that you propose to carry out the activities. Dates set by NPWS may differ from dates proposed here. *A derogation will only be issued with a start and end date within a calendar year.*

Start Date:	20.04.2026
End Date:	31.12.2026

## Part C: Nature of the Derogation.

1. Please tick which prohibition(s) the application for a derogation relates to:

<b>Regulation 51</b>	
Deliberately capture or kill any specimen of the relevant species in the wild	<input type="checkbox"/>
Deliberately disturb these species particularly during the period of breeding, rearing, hibernation and migration	<input checked="" type="checkbox"/>
Deliberately take or destroy eggs of the relevant species in the wild	<input type="checkbox"/>
Damage or destroy a breeding or resting place of such an animal, or	<input type="checkbox"/>
Keep, transport, sell, exchange, offer for sale or offer for exchange any specimen of the relevant species taken in the wild, other than those taken legally as referred to in Article 12(2) of the Habitats Directive.	<input type="checkbox"/>
<b>Regulation 52</b>	
Deliberately pick, collect, cut, uproot or destroy any specimen of these species in the wild, or	<input type="checkbox"/>
Keep, transport, sell, exchange, offer for sale or offer for exchange any specimen of these species taken in the wild, other than those taken legally as referred to in Article 13(1)(b) of the Habitats Directive.	<input type="checkbox"/>

**Further information should be provided in the format set out in Part E: Template for Supporting Information**

## Part D: Derogation Tests

**Note: The following summary information must be provided by the applicant in all cases, and will be used to determine if a derogation can be provided. Further information must be provided in the format set out in Part E: Template for Supporting Information**

### Test 1: Reason for the Derogation

1. Please tick which reason(s) below explains how this application qualifies under Regulation 54(2)(a-e) or Regulation 54A(2)(a-e) of the European Communities (Birds and Natural Habitats) Regulations: Please provide a summary of how the application meets the 3 conditions required to provide a derogation. Note that in all cases additional information must be provided (see Part E).

<b>a.</b>	In the interests of protecting wild flora and fauna and conserving natural habitats <b>(proceed to 1a)</b>	<input type="checkbox"/>
<b>b.</b>	To prevent serious damage, in particular to crops, livestock, forests, fisheries and water and other types of property <b>(proceed to 1b)</b>	<input type="checkbox"/>

c.	In the interests of public health and public safety, or for other imperative reasons of overriding public interest, including those of a social or economic nature and beneficial consequences of primary importance for the environment <b>(proceed to 1c)</b>	<input checked="" type="checkbox"/>
d.	For the purpose of research and education, of re-populating and re-introducing these species and for the breeding operations necessary for these purposes, including artificial propagation of plants <b>(proceed to 1d)</b>	<input type="checkbox"/>
e.	To allow, under strictly supervised conditions, on a selective basis and to a limited extent, the taking or keeping of certain specimens of the species to the extent specified therein, which are referred to in the First Schedule <b>(proceed to 1e)</b>	<input type="checkbox"/>

**1a.** In the interests of protecting wild flora and fauna and conserving natural habitats:

i) Please state the wild flora, fauna or habitats that require protection and /or conservation.

--	--	--

ii) Please summarise how the interests of protection and conservation of the species/habitat concerned justify affecting another species under strict protection.

--	--	--

**1b)** To prevent serious damage, in particular to crops, livestock, forests, fisheries and water and other types of property:

i) Please summarise the nature of the potential damage, why it is considered “serious” and how this outweighs the conservation interest of the species under strict protection.

--	--	--

**1c)** In the interests of public health and public safety, or for other imperative reasons of overriding public interest, including those of a social or economic nature and beneficial consequences of primary importance for the environment:

- i) Where the reason is for public health and public safety, summarise the evidence provided to support this reason (e.g. documentary evidence of the risk from a chartered structural engineer, tree surgeon, Garda Síochána, qualified health professional etc.)

This application is not based on site-specific evidence of an immediate public health or public safety risk. The application instead relies on the overriding public interest limb below.

- ii) Where the reason is for “other imperative reasons of overriding public interest, including those of a social or economic nature and beneficial consequences of primary importance for the environment”, summarise the nature of the public interest and how this outweighs the conservation interest of the species under strict protection.

The derogation is required to enable detailed bat roost surveys in the context of ecological assessment work associated with construction, renovation and demolition projects. It will authorise low-level survey disturbance only, principally the placing of static detectors and thermal imaging equipment at or near known or suspected bat roosts, and only in rare instances the use of an endoscope where this is necessary to identify species, roost location or approximate numbers. The information gathered is required to accurately identify roost species, locations and use, so that lawful avoidance measures can be designed first and, where avoidance is not possible, appropriate mitigation and any subsequent site-specific derogation application can be properly informed. Without this information, developments and works of social and economic importance may be delayed or unable to proceed lawfully, and bat protection measures may be poorly specified. The derogation therefore serves an overriding public interest while also improving the protection of bats by ensuring that decisions are informed by accurate survey data

- 1d)** For the purpose of research and education, of re-populating and re-introducing these species and for the breeding operations necessary for these purposes, including artificial propagation of plants:

- i) Please summarise the objective(s) of the proposed activities making reference to those listed above and how the the purpose of such activities overrides the interests of strict protection of the species. <sup>1</sup>

---

<sup>1</sup> Note that this reason may be appropriate for when research involves surveys that may cause disturbance of species under strict protection. But the sole purpose of the surveys should be for research and education or the other reasons listed above under 1d.

**1e)** To allow, under strictly supervised conditions, on a selective basis and to a limited extent, the taking or keeping of certain specimens of the species to the extent specified therein, which are referred to in the First Schedule

i) Please clearly state the objective of the activity and verify that this reason is being chosen as the objective of the activity does not match reasons a-d listed above.

--	--	--

ii) Please summarise how the activity will result in the taking or keeping of limited numbers of specimens of the species, how it will be applied on a selective basis and to a limited extent, and how it will be done under strictly supervised conditions.

--	--	--

**Test 2: Absence of Alternative solutions**

**2.** Please summarise the alternative solutions that have been considered and why these solutions are deemed unsatisfactory. This must include the option of the “do-nothing” alternative and evidence should be objective and robust. Note that in all cases further information must be provided in the format set out in Part E: Template for Supporting Information.

Alternative Solution	Reasons for “Unsatisfactory”
Do-Nothing	If no further survey is undertaken, roost entrances, exact roost locations, species and approximate numbers will remain uncertain. That uncertainty can prevent lawful and properly informed avoidance measures, and can also prevent any later site-specific derogation application from being properly detailed where unavoidable works arise. The do-nothing option is therefore unsatisfactory because it fails to generate the information necessary to protect bats and to allow lawful project progression
Rely solely on external emergence/re-entry survey observations	External observation alone is not always sufficient, particularly for large structures with many internal PRFs such as warehouses.

	<p>Bats may be seen emerging from a building, but the precise roost access point, internal roost location, or species present may remain unclear. In complex structures with several rooms, emergence surveys may be of little to no use. Alternatively, placing statics inside can determine which room the roost is in, thereby allowing more accurate representation of species and location, providing a level of information that is sufficient to inform accurate avoidance or mitigation</p>

\* Please insert additional rows above if needed

**Test 3: Impact of a Derogation on Conservation Status**

3. Please summarise the possible impacts on the population of the species that is subject to this application, taking into account all the mitigation and/or compensation measures that are to be undertaken. Evidence that such mitigation has been successful elsewhere should be provided where relevant. Mitigation measures being relied upon must ensure that the derogation will not be detrimental to the maintenance of the populations of the species to which the Habitats Directive relates at a favourable conservation status in their natural range. Note that in all cases further

information must be provided in the format set out in Part E: Template for Supporting Information.

The proposed activities are designed to be of as little impact as possible to any bat species encountered during the course of surveys. Following the collection of data under this licence, the information gathered would be used to maintain and improve bat populations where possible, at both site and population level.

The purpose of the derogation is to obtain the information necessary to accurately identify roost locations, species, and patterns of use, so that impacts can be avoided wherever possible and where avoidance is not possible, appropriate mitigation can be designed and implemented. This will assist in maintaining the continued use of roosts where feasible and in ensuring that any mitigation is properly informed, proportionate, and effective.

The likely effects of the activities authorised under this derogation are minor, temporary, and localised, and will not affect bat survival, breeding success, or overall roost viability. The proposed activities are limited to low-level survey disturbance and will not involve capture, handling under this derogation, roost modification, or structural alteration. Equipment will be installed and retrieved over short periods with minimal time spent at the roost. Thermal imaging and acoustic monitoring are non-invasive or low-impact methods and are used specifically to reduce the need for more intrusive survey techniques.

Where access to a known or suspected roost is required, disturbance will be minimised through strict working methods, including limiting time at the roost, avoiding unnecessary illumination, using only minimal lighting and red light where required, maintaining quiet working practices, and restricting entry to sensitive areas. During the hibernation season, only one person will enter a roost area and the survey will be abandoned immediately if any hibernating bats show signs of waking.

Accordingly, the activities authorised under this derogation will not undermine the conservation status of bats in their natural range. Rather, the information obtained under the derogation will improve the ability to avoid impacts in the first instance and to implement effective mitigation where required, thereby contributing to the maintenance of bat populations at a favourable conservation status

## Part E: Template for Supporting Information

This application form should provide a summary of the evidence that the applicant has provided. In all cases, it is necessary to provide separate supporting information so that the assessment of the application can be undertaken in a robust and comprehensive manner. Applicants should refer to guidance provided by the NPWS and the European Commission whilst preparing this application form and the supporting information.

It is essential that supporting information is prepared in a consistent manner using the template below so that NPWS officials assessing the application can locate the relevant evidence to determine if the three Tests can be met. Failure to provide sufficient evidence will result in the application being refused.

The structure of the Supporting Information should be as follows:

- 1) Table of Contents
- 2) Introduction
  - a. Objective of the proposed works (for example, as part of construction of a national road, repair of roofing, undertaking surveys etc.)
  - b. Name, qualifications and relevant experience of scientific staff, including trainees, (e.g. ecologist) involved in the preparation of the application and those responsible for carrying out the proposed activity.
  - c. If this application is for the carrying out of surveys that may cause disturbance, qualifications of all involved must be provided and trainees must be clearly identified.
- 3) Background to proposed activity including location, ownership, type of and need for the proposed activity, planning history, policy context, zoning in relevant Development plan (or equivalent), etc.
- 4) Full details of proposed activity to be covered by the derogation (including a site plan). The site may be inspected by an NPWS representative, so the details given should clearly reflect the extent of the project. This information will be used to compare site conditions with the Method Statement.
- 5) Ecological Survey and site assessment (Not required for applications to carry out surveys)
  - a. Pre-existing information on species at location and environs.
  - b. Status of the species in the local/regional area (relevant to the consideration of the impact on the population at the relevant geographic scale (Test 3))
  - c. Objective(s) of survey
  - d. Description of Surveys Area
  - e. Survey methodology (including evidence as to how the methodology represents best practice and is appropriate to the Objective). Methodology should include survey maps, details of timing, climate, equipment used and identify any uncertainties or difficulties encountered.
  - f. Survey results including raw data, any processed or aggregated data, and negative results as appropriate. Photographs and maps must be provided where site-specific features are referred.
  - g. Population size class assessment.
- 6) Evidence to support the Derogation Tests
  - a. Test 1 - Reason for Derogation:
    - i. There should be a clear explanation as to why a specific reason(s) has been selected in the application form.

- ii. Applicants are advised to read the guidance published by the NPWS '[Guidance on Applications for Regulation 54 Derogations for Annex IV species: Guidance for Applicants](#)' with specific reference to Section 3.1.
- b. Test 2 - Absence of Alternative Solutions
  - i. Applicants must list the alternatives to the proposed activity that have been considered, including the do-nothing alternatives in a clear and objective manner. A basic requirement is that these alternatives should be compared in terms of their impact on the species subject to strict protection. It should be clear to NPWS officials as to why the chosen approach has been selected.
  - ii. Applicants are advised to read the guidance published by '[Guidance on Applications for Regulation 54 Derogations for Annex IV species: Guidance for Applicants](#)' with specific reference to Section 3.2.
- c. Test 3 - Impact of a derogation on Conservation Status
  - i. Applicants should include details of the population at the appropriate geographic scale and an evaluation of how the proposed activity will affect the conservation status both before and after mitigation measures have been applied.
  - ii. Full and detailed descriptions of proposed mitigation measures that are relevant to the potential impact on the target species. Evidence that such mitigation has been successful elsewhere should be provided, where available.
  - iii. Applicants are advised to read the guidance published '[Guidance on Applications for Regulation 54 Derogations for Annex IV species: Guidance for Applicants](#)' with specific reference to Section 3.3.

7) Monitoring the impacts of the derogations

- a. Applicants must include details of how they propose to verify whether the derogations have been implemented correctly and whether they achieved their objective, using scientifically based evidence, and, if necessary, how the applicant will take corrective measures where required.
- b. Applicants should provide details of proposed reports to be submitted to the NPWS including the results of monitoring.
- c. Applicants are advised to read the guidance published by the European Commission "[Guidance document on the strict protection of animal species of Community interest under the Habitats Directive](#)" with specific reference to Section 3.4.

## Part F. Declaration

I declare that all of the foregoing particulars are, to the best of my knowledge and belief, true and correct. I understand that the deliberate killing, injuring, capturing or disturbing of protected species, or damage or destruction of their breeding sites or resting places or the deliberate taking or destroying of eggs is an offence without a derogation and that it is a legal requirement to comply with the conditions of any derogation I may be granted following this application. I understand that NPWS may visit to check compliance with a derogation.

Please note that under Regulation 5 of the European Communities (Birds and Natural Habitats) Regulations 2011-2021 an authorised officer may enter and inspect any land or premises for the purposes of performing any of their functions under these Regulations or for obtaining any information which they may require for such purposes.
