**Derogation Number
DER-BAT-2026-274**

**EUROPEAN COMMUNITIES (BIRDS AND NATURAL HABITATS) REGULATIONS, 2011
(S.I. No 477 of 2011)**

DEROGATION

Granted under Regulation 54A of the European Communities (Birds and Natural Habitats) Regulations 2011, hereinafter referred to as “the Habitats Regulations”.

The Minister for Housing, Local Government & Heritage, in exercise of the powers conferred on him by Regulation 54A of the Habitats Regulations hereby grants to **Seán Meehan of National Parks and Wildlife Service, Government Buildings, Athlumney, Kilcarn, Co. Meath, C15 FEF2** a derogation. It is stated that this derogation is issued:

- A. In the interests of public health and public safety, or for other imperative reasons of overriding public interest, including those of a social or economic nature and beneficial consequences of primary importance for the environment
- B. As there is no satisfactory alternative, and the action authorised by this derogation will not be detrimental to the maintenance of the population of **bats** referred to below at a favourable conservation status in their natural range.

This derogation authorises the following:

- 1. Roost disturbance
- 2. Actions authorised within the derogation

The derogation is issued in respect of the following **bat species**:

- | | |
|------------------------|----------------------------------|
| • Lesser Horseshoe Bat | Rhinolophus Hipposideros |
| • Brown Long-Eared Bat | Plecotus Auritus |
| • Natterer’s Bat | Myotis Nattereri |
| • Common Pipistrelle | Pipistrellus Pipistrellus |
| • Soprano Pipistrelle | Pipistrellus Pygmaeus |
| • Leisler’s Bat | Nycatalus Leisler |
| • Daubenton’s Bat | Myotis Daubentonii |
| • Whiskered Bat | Myotis Mystacinus |

Terms and Conditions

1. This derogation is granted solely to allow the activities specified in connection with the works located at **Nationwide**, for **Seán Meehan**.
2. All activities authorised by this derogation, and all equipment used in connection herewith, shall be carried out, constructed and maintained (as the case may be) so as to avoid unnecessary injury or distress to any species of **BAT**. Anything done other than in accordance with the terms of this derogation may constitute an offence
3. This derogation may be modified or revoked, for stated reasons, at any time. In addition, the Minister reserves the right to revoke the derogation where updated information indicates that the basis upon which the derogation was granted has materially changed.
4. The mitigation measures outlined in the accompanying application report, together with any changes or clarification agreed in correspondence between NPWS and the agent or applicant, are to be carried out. Strict adherence must be paid to all the proposed measures in the application.
5. The actions which this derogation authorise shall be completed between **06th August – 31st December 2026, inclusive**.
6. If this derogation expires prior to works permitted under this derogation commencing, a new application must be sought in advance, including the provision of any updated data or reports.
7. This derogation shall be produced for inspection on a request being made on that behalf by a member of An Garda Síochána or an authorised NPWS officer appointed under Regulation 4 of the Habitats Regulations.
8. On completion of the actions which this derogation authorises, all recordings of bat species affected will be made using the standardised data form provided below and must be submitted to the NPWS **within four weeks of the expiry date of this derogation**. Included with the below returns form, a report will also be submitted to wildlife.reports@npws.gov.ie detailing results of works and success of mitigation. **Both documents must be submitted to constitute a derogation return.**

For the Minister for Housing, Local Government & Heritage

Fiona O' Mahony.

(an officer authorised by the Minister to sign on his behalf)

06 August 2026

Any query in relation to this derogation should be sent to reg54derogations@npws.gov.ie

Derogation Assessment

Name of Applicant: Seán Meehan

Location/Name of Project: NPWS Conservation Ranger duties

Tick the following prohibition as chosen on the application:

(a) Deliberately capture or kill any specimen of the relevant species in the wild	☐
(b) Deliberately disturb these species particularly during the period of breeding, rearing, hibernation and migration	☒
(c) Deliberately take or destroy eggs of the relevant species in the wild	☐
(d) Damage or destroy a breeding or resting place of such an animal, or	☐
(e) Keep, transport, sell, exchange, offer for sale or offer for exchange any specimen of the relevant species taken in the wild, other than those taken legally as referred to in Article 12(2) of the Habitats Directive.	☐
(a) Deliberately pick, collect, cut, uproot or destroy any specimen of these species in the wild, or	☐
(b) Keep, transport, sell, exchange, offer for sale or offer for exchange any specimen of these species taken in the wild, other than those taken legally as referred to in Article 13(1)(b) of the Habitats Directive.	☐

Test 1: A reason(s) listed in Regulation 54 (a)-(e) applies to the proposed activity

i. Tick which reason the applicant claims should be applied to the derogation

(a) In the interests of protecting wild flora and fauna and conserving natural habitats,	☐
(b) To prevent serious damage, in particular to crops, livestock, forests, fisheries and water and other types of property	☐
(c) In the interests of public health and public safety, or for other imperative reasons of overriding public interest, including those of a social or economic nature and beneficial consequences of primary importance for the environment,	☒
(d) For the purpose of research and education, of re-populating and re-introducing these species and for the breeding operations necessary for these purposes, including artificial propagation of plants, or	☐
(e) To allow, under strictly supervised conditions, on a selective basis and to a limited extent, the taking or keeping of certain specimens of the species to the extent specified therein, which are referred to in the First Schedule.	☐

ii. Test 1: Conclusion

Please tick the following where it applies:

There is a valid reason(s) listed in Regulation 54 (a)-(e) which applies to the proposed activity:	Yes	☒
	No	☐

Please outline your analysis below and state how the applicant has provided evidence to support your conclusion:

The derogation is considered under Regulation 54(2)(b) to enable this NPWS staff member, Conservation Ranger Sean Meehan, to carry out bat roost visits during the course of his official duties. The derogation application form provided by the applicant has been reviewed in full.

The purpose of these inspections is to determine the presence, status and conservation requirements of a potential bat roost and provide landowners, developers and homeowners with accurate information regarding their legal obligations. This licence will also cover roost inspection for the purposes of monitoring bat populations. Sean has experience working in ecological consultancy and has carried out numerous bat surveys, monitoring and implementation of mitigation measures and currently holds a bat handling licence, C024/2026. The EAU is of the opinion that this application meets the criteria to satisfy reason 54(2)(c). Based on the above, the application can now proceed to Test 2.

Test 2: Absence of a satisfactory alternative

Please tick the following where it applies and add a comment below to support the recommendation:

The applicant has provided satisfactory evidence that alternative solutions have been considered and have given reasons why the proposed approach is the only satisfactory alternative:	Yes	☒
	No	☐

Please outline your analysis below and state how the applicant has provided evidence to support your conclusion (If you wish to add additional conditions please complete pg. 6):

The applicant has considered alternative approaches to the proposed activity. The alternative option of taking no action would not allow the licensee to fulfil their statutory duties in relation to bat roost monitoring. In most cases there is no effective substitute for direct inspection of bat roosts, particularly where accurate assessment and monitoring of bat populations are required. While emergence surveys may be used where internal access is not possible or where entering a roost could cause unnecessary disturbance, they cannot provide the same level of information in all circumstances. Reliance on emergence surveys alone would also be impractical, as they are resource-intensive, requiring significant staff time and effort, whereas multiple roosts can be assessed during daylight inspections.

In occupied residential properties, internal inspections provide valuable evidence of bat presence and roost use that may not be detected through emergence surveys. Furthermore, emergence surveys may result in false-negative findings where bats are present but are not observed leaving the roost during the survey period.

Based on the assessment of the application documentation, it is regarded that the applicant has considered the available alternative solutions and the proposed approach is the only satisfactory alternative. The EAU has concluded that the application has passed Test 2 and can proceed to Test 3.

Upon completion of your assessment, please return this Recommendation to WLU to continue the application process.

Test 3: Impact of a derogation on conservation status of the species

Please tick the following where it applies and add a comment below to support the recommendation:

The derogation would NOT be detrimental to the maintenance of the populations of the species in question at a favourable conservation status in their natural range.	Yes	☒
	No	☐

Please outline your analysis below and state how the applicant has provided evidence to support your conclusion. (If you wish to add additional conditions please complete pg. 6)

The applicant has specified that best practice methodology will be followed during all proposed bat roost assessments. The applicant is familiar with the Department's Bat Mitigation Guidelines (2022) and the Department's guidance on the Strict Protection of Annex IV species. The applicant will follow the NPWS roost survey protocol at all times.

The most recent population estimates, trends and background information for six Irish bat species have been outlined in a supporting document for Article 17 reporting 2018-2023 (Roche & Langton, 2024). The general population estimates and trends also stability or increases.

Therefore, the EAU is of the opinion the proposed derogation would not be detrimental to the maintenance bat populations at a favourable conservation status in their natural range.

If the answer above is Yes then the derogation may be granted, providing Tests 1 and 2 have also been met.

Upon completion of your assessment, please return this Recommendation to WLU to continue the application process.

Derogation decision

The application for a derogation under Regulation 54 of the European Communities (Birds and Natural Habitats) Regulations, 2011 (S.I. 477 of 2011), as amended, has been assessed by officials in the Department and the following decision has been made:

Tick box where appropriate:

There is no satisfactory alternative

☒

and the derogation is not detrimental to the maintenance of the populations of the species to which the Habitats Directive relates at a favourable conservation status in their natural range.

☒

Therefore, a derogation may be granted to the applicant, since it is—

(a) in the interests of protecting wild fauna and flora and conserving natural habitats

☐

(b) to prevent serious damage, in particular to crops, livestock, forests, fisheries and water and other types of property,

☐

(c) in the interests of public health and public safety, or for other imperative reasons of overriding public interest, including those of a social or economic nature and beneficial consequences of primary importance for the environment,

☒

(d) for the purpose of research and education, of repopulating and re-introducing these species and for the breeding operations necessary for these purposes, including the artificial propagation of plants, or

☐

(e) to allow, under strictly supervised conditions, on a selective basis and to a limited extent, the taking or keeping of certain specimens of the species to the extent specified therein, which are referred to in the First Schedule.

☐

OR This application has been refused as one or more of the conditions set out above have not been met

☐
