

# Invertebrate hunt

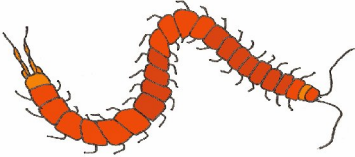

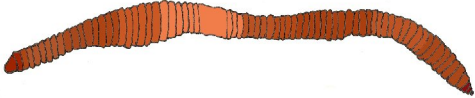

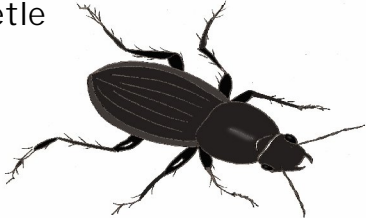

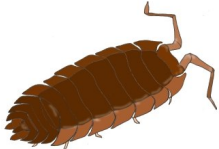

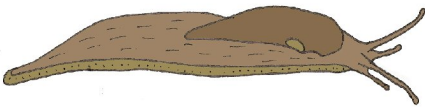

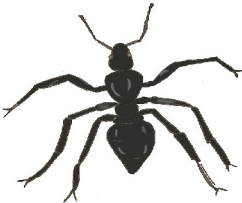

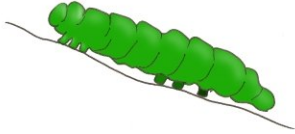

Field trip activity

# Recording table

Identify the species of Invertebrates you found on your woodland floor invertebrate hunt.  
Record the number of each species you found.

Compare your invertebrates with the ones in the table below.  
If you can't identify it draw a sketch of it on the next page and look it up in class.

Species	Number found	Species	Number found
Centipede 		Snail 	
Millipede 		Worm 	
Beetle 		Woodlice 	
Slug 		Spider 	
Ant 		Caterpillar 	

# Invertebrate hunt

Can't identify it?

Why not draw a sketch of your find to help you remember what it looked like. If you Label your sketch it also helps you remember.

Ask yourself these questions and take a note of the answers.

Does it have any legs? If so how many?

Has it got more than one part to its body?

What colour is it?

Does it have wings?
