1. SITE IDENTIFICATION

1.1 Type B	1.2 Site code IE0000278	Back to top
----------------------	-----------------------------------	-----------------------------

1.3 Site name

Inishbofin and Inishshark SAC

1.4 First Compilation date 1997-03	1.5 Update date 2020-10
--	-----------------------------------

1.6 Respondent:

Name/Organisation: National Parks and Wildlife Service, Department of Culture, Heritage and the Gaeltacht
Address: 90 King Street North, Dublin 7, D07 N7CV, Ireland
Email: datadelivery@chg.gov.ie

Date site proposed as SCI:	1997-08
Date site confirmed as SCI:	No data
Date site designated as SAC:	2019-12
National legal reference of SAC designation:	655/2019

2. SITE LOCATION

2.1 Site-centre location [decimal degrees]:

[Back to top](#)

Longitude
-10.22419072

Latitude
53.61659653

2.2 Area [ha]:
2856.74811

2.3 Marine area [%]
54.585

2.4 Sitelength [km]:
0.0

2.5 Administrative region code and name

NUTS level 2 code **Region Name**

IEZZ	Extra-Regio
IE01	Border, Midland and Western

2.6 Biogeographical Region(s)

Atlantic (%)

3. ECOLOGICAL INFORMATION

[Back to top](#)

3.1 Habitat types present on the site and assessment for them

Annex I Habitat types						Site assessment			
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C		
						Representativity	Relative Surface	Conservation	Global
1150			7.9564		M	A	C	A	A
3110			6.9864		M	C	C	C	C
4010			279.52		M	C	C	C	C
4030			419.29		M	C	C	C	C

- **PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- **NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- **Cover:** decimal values can be entered
- **Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive

Other Site Characteristics

The site is situated c.5 km off the Galway coast. It comprises two main islands, with several islets and stacks and the surrounding waters, to 200 m, are included. The islands are composed almost entirely of Silurian slates and shales, and rise to heights of 89 m (Inishbofin) and 69 m (Inishshark). Inishbofin is inhabited, Inishshark was abandoned in the 1960s. The main habitat of the islands is rocky heath. Pasture grassland of varying quality, but often wet, is frequent on Inishbofin, less so on Inishshark. Several small lakes occur on Inishbofin, the largest Lough Bofin having a brackish character. The shorelines of the islands vary from bedrock shore to low cliffs. Some sheer cliffs occur at Inishshark. Several sandy beaches occur. The main landuse is grazing by sheep and cattle.

4.2 Quality and importance

Lough Bofin is an excellent example of an isolated sedimentary lagoon with a cobble barrier. This type of lagoon is relatively rare in Ireland. The fauna of the lagoon is poor, but this may be due to entirely natural 'island effects'. The flora, however, comprises a very interesting *Ruppia/Lamprothamnion* community with 4 lagoonal specialists, including a Red Data charophyte. The habitat is in very natural condition, well conserved and prospects for maintenance of structure appear excellent. The site supports examples of lowland oligotrophic lakes. A significant population of *Halichoerus grypus* occurs, the fourth largest in Ireland. The site supports regular populations of six Annex I Bird Directive species, including breeding *Crex crex* and a large wintering flock of *Branta leucopsis*. *Calamagrostis epigejos*, a legally protected plant species, plus three other Red Data Book species - *Tuberaria guttata*, *Lycopodium inundatum* and *Lamprothamnion papulosum* occur. The quality of the terrestrial habitats is often poor due mainly to grazing pressures, however, good examples of wet & dry heaths occur.

4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

Negative Impacts			
Rank	Threats and pressures [code]	Pollution (optional) [code]	inside/outside [i o b]
L	C01.01		i
M	J02.02.01		b
M	K04.05		i
L	F02.01		i
M	L07		b
L	H05.01		b
M	J02.12.01		i
L	I01		b
H	D04.01		i
L	J01.01		i
M	E01.03		b
M	L08		i
L	F02.01.01		i
L	G01.02		b
H	A04.01.02		b

Positive Impacts			
Rank	Activities, management [code]	Pollution (optional) [code]	inside/outside [i o b]
M	J03.03		b
L	F03.02.04		b
H	A04		b

Rank: H = high, M = medium, L = low

Pollution: N = Nitrogen input, P = Phosphor/Phosphate input, A = Acid input/acidification,

T = toxic inorganic chemicals, O = toxic organic chemicals, X = Mixed pollutions

i = inside, o = outside, b = both
