Other Site Characteristics

A wooded valley cut through calcareous glacial drift, with the fast-flowing Glencullen river flowing west to east through it. Vegetation types include broadleaf deciduous woods, including wet woodland near the river, heath and a number of tufa-forming springs and seepage areas.

4.2 Quality and importance

A relatively small, but diverse wooded valley, notable for the occurrence of good examples of tufa-forming springs and associated alluvial forest. The site is also important for a number of rare plants, including *Erigeron acer*, *Lamium galeobdolon* and *Wahlenbergia hederacea*, and a particularly diverse woodland invertebrate fauna. Its proximity to Dublin adds to its value as an educational and amenity resource.
