- **NP:** in case that a species is no longer present in the site enter: x (optional)
- **Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

- **Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

4. SITE DESCRIPTION

4.1 General site character

Habitat class	% Cover
N08	4.0
N10	4.0
N14	44.0
N06	48.0
Total Habitat Cover	100

Other Site Characteristics

Kiltiernan is a simple linear depression running SW from the main Galway-Limerick road. There are small cliffs and rock outcrops with bushes at its eastern end but to the west these are replaced with smoother fields of pasture. The basin slopes towards the NE so at this end there are a few semi-permanent pools. Conversely the SW end has other depressions that only flood in very high groundwater levels.

4.2 Quality and importance

The basin is split between two landowners and the level of land use is very different. The eastern (non-intensive) end is of fine quality and its vegetation is typical of a fairly dry turlough with considerable species diversity. The Red Data Book plant species *Viola persicifolia* and *Frangula alnus* are found here in this section. The western end is part of an intensive dairy farm and there is little interest in the vegetation.

4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

Negative Impacts			
Rank	Threats and pressures [code]	Pollution (optional) [code]	inside/outside [i o b]
M	H01.08		o
H	D01.02		o
M	H02.06		o
H	A08		b
M	J02.05		b
H	A02.01		b

Positive Impacts			
Rank	Activities, management [code]	Pollution (optional) [code]	inside/outside [i o b]
L	X		i

Rank: H = high, M = medium, L = low

Pollution: N = Nitrogen input, P = Phosphor/Phosphate input, A = Acid input/acidification,

T = toxic inorganic chemicals, O = toxic organic chemicals, X = Mixed pollutions

i = inside, o = outside, b = both
