- **Group**: A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- **S**: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- **NP**: in case that a species is no longer present in the site enter: x (optional)
- **Type**: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- **Unit**: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see reference portal)
- **Abundance categories (Cat.)**: C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- **Data quality**: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

4. SITE DESCRIPTION

4.1 General site character
Other Site Characteristics
This site consists of a small two-roomed stone dwelling situated in Rossacrue Wood, North of Kilgarven, Co. Kerry. It is used by > 100 Lesser Horseshoe Bats as a summer breeding site. The bats gain access through an opening over a doorway at the rear of the building and through a window leading to a small loft. The bats hang from the roof timbers in the loft. The surrounding wood provides suitable foraging habitat and shelter for bats as they commute to the - at present - unknown hibernation site.

4.2 Quality and importance
As this site is used by >100 Lesser Horseshoe Bats (Rhinolophus hipposideros), it is a site of international importance. Repair work undertaken at the site improved conditions by increasing the internal temperature and by excluding light, windows and a door below the loft were blocked to secure the site.

4.3 Threats, pressures and activities with impacts on the site
The most important impacts and activities with high effect on the site
