Other Site Characteristics
The site is located in Dunmanus Bay, in the extreme south-west of Co. Cork. It comprises a small headland, the inner part of which is improved grassland and not part of the site. Shingle bars occur on both sides of the headland and merge with heath, salt marsh and a small lagoon. On the seaward side, the shingle is associated with bedrock shore.

4.2 Quality and importance
While small in area, the site contains an important example of a vegetated shingle spit in association with a small lagoon. It supports a typical flora, including lichens, and is of high quality.

4.3 Threats, pressures and activities with impacts on the site
